SUMMARY

Software engineer with a couple of years of practical experience working on real client projects across web development and production systems. I have contributed to platforms used in active business operations, managed deployments, and worked closely with clients to deliver solutions that meet their needs. I work well in structured environments, take deadlines seriously, and bring a level of care and consistency to my work that goes beyond just getting things done. I am always building or learning something new, which keeps me sharp and adaptable.

EDUCATION

African Leadership University | *BSc (Hons) in Software Engineering* Kigali, Rwanda | May 2024 - Present

- Cumulative **GPA**: 4.10
- Relevant Coursework: Python programming, Version Control with Git and GitHub, Database Management (SQL), Shell Scripting.

Python, SQL, JavaScript, Java, C/C++, PHP	HTML5, CSS3, React, WordPress, Figma	Git/GitHub, VS Code, PostgreSQL, Linux/Shell	Next.js, TypeScript, Flask APIs, Cloud Fundamentals

PROJECTS

Ngali Mining App and Minetech Platform | *Next.js, TypeScript, PostgreSQL, Drizzle ORM* [GitHub]

A requisition and workflow management system used across multiple departments at Ngali Mining.

- Developed department-specific modules and integrated database-backed workflows.
- Implemented clean UI components and structured CRUD operations for core features.

Lauture Global Ltd | *Durable, Next.js, TypeScript, PostgreSQL, Drizzle ORM* [View]

Client Website & Digital Infrastructure — Lauture Global LTD.

- Migrated client from a website builder to a fully custom-coded platform, managing DNS configuration and domain transfer across multiple providers.
- Implemented scalable architecture and clean UI components, designed to evolve into a full web application.

The Culture Plug | *Next.js, TypeScript, Vercel, Lovable* [View]

A modern e-commerce website for a streetwear brand focused on limited-drop merch inspired by music and anime culture.

- Designed and developed a responsive, mobile-first UI with a dark-themed aesthetic and smooth animations.
- Implemented dynamic product pages, category filtering, and a WhatsApp-based ordering flow for seamless user interaction.

EXPERIENCE

Minetech Ltd. | *Software Developer Intern & Personal Assistant* Kigali, Rwanda | Sept 2025 - May 2026

- Contributed to the development and testing of the Ngali Mining web application, working with the team to improve features and usability.
- Troubleshot backend and API issues and helped implement fixes.
- Assisted with documentation and deployments to keep systems running smoothly.

Schnell Media Rwanda Ltd. | *Photoshop Operator* Kigali, Rwanda | July 2023 - Feb 2025

- Delivered high-quality edits for 100+ client projects under strict deadlines.
- Standardized editing workflows, improving team efficiency and consistency.
- Increased repeat business by 15% through reliable and professional output.

Klab Rw | *Software Developer Intern* Kigali, Rwanda | June 2022 - Aug 2022

- Built responsive websites for SMEs, improving their online presence and engagement.
- Designed UI layouts and integrated features tailored to client branding needs.
- Delivered 5+ production-ready sites and trained clients on managing their platforms.
